A full-service laboratory specialising in crowns, bridges, implants, dentures, and partial frames since 2009. Now with the 3shape D2000 scanner as well as the VHF S1 and S2 milling machines, our qualified team are designing and milling in-house, reducing the turn-around time and eliminating the need to outsource jobs. We are a boutique dental lab that focuses on innovation and technology to produce the best possible product for our clients at an affordable and competitive price.
